### 📁 PROJECTS

#### E-Gram portal

E-Gram portal | 2023 Developed a web-based E gram portal to provide a single window for users to access government services. The portal is built using Angular on the frontend and Spring Boot on the backend. It is hosted on a MySQL database. The portal allows users to register, apply for government schemes, track the status of their applications, and view other relevant information

#### Electronic Appliances Ordering System

Developed a web application using Angular for the frontend and Spring for the backend, known as "Electronic Ordering System" where customer can buy things. Admins can post items for sale, and regular users can browse and buy those items.
